PROFESSIONAL PROFILE

Senior Technical Architect and BIM Coordinator with 16+ years of experience across the UAE and Algeria, and project delivery exposure in Saudi Arabia. Career progression from architectural design and hospital functional planning to construction-stage technical coordination, BIM information management and complex super high-rise developments. Combines consultant- and contractor-side judgment with RICS BIM Management certification (ISO 19650), practical AI architectural visualization and developing Revit–Claude MCP / CAD-to-BIM automation workflows.

CORE EXPERTISE

Architectural Concept & Detailed Design | Healthcare / Oncology Facilities | Super High-Rise & Mixed-Use | Tender / IFC / Shop Drawing Review | Buildability | Architecture–Structure–MEP–Façade Coordination | RFIs, Submittals & BOQ Review | QA/QC | Dubai Building Code, DM / DCD / DEWA

BIM & Digital: EIR, LOD / LOIN; BEP, MIDP & TIDP review and updates; CDE / ACC; federated model coordination; clash review; model data and naming conventions. Revit, Navisworks, AutoCAD, BIM 360 / ACC, Bluebeam, Enscape, Twinmotion, Photoshop / Lightroom.

PROFESSIONAL EXPERIENCE

Freelance Interior Designer & 3D Visualization — Independent Practice | May 2026 – Present

- Develop residential space planning, interior concepts, finishes and photorealistic client presentations for renovation and luxury interior projects; produce AI-assisted images and architectural animation.
- Expanding automation through an active Revit–Claude MCP connection and CAD-to-BIM modelling experiments.

Senior Architect / BIM Coordinator — Model Engineering Consultant, Dubai | 03 Nov 2025 – May 2026

- Coordinated architectural and technical review for two separate towers: a 90-storey Downtown Dubai residential tower and a 50-storey Sheikh Zayed Road tower (approx. 130,000 m² GFA).
- Reviewed design layouts, façade interfaces and multidisciplinary packages; tracked Arch / Structural / MEP coordination, constructability and authority review comments against Dubai Building Code, DM, DCD and DEWA requirements.

Senior Architect — James Cubitt & Partners, Riyadh | Jul 2025 – Oct 2025

- Kings' Square: supported detailed design and tender deliverables for an eight-tower mixed-use project (approx. 151,473 m² GFA).
- Coordinated façade, BMU / cleaning systems, green roofs, thermal insulation, landscape interfaces, structural / MEP reviews and clash resolution.

Senior Technical Architect — EAS / Adnan Saffarini Engineering Consultants, Dubai | Dec 2023 – May 2025

- Electra and Vega: coordinated high-rise design information and checked outsourced model geometry, element classification and data deliverables against client EIR and LOD / LOIN expectations.
- Reviewed and updated BEP, MIDP, TIDP and CDE processes under ISO 19650; coordinated between client, consultancy, CAD production and external modelling teams.

PROFESSIONAL EXPERIENCE — CONTINUED

Technical Architect — Great Brand / ILK Joint Project, Algeria | Dec 2022 – Dec 2023

- Supported contractor technical department on healthcare construction: IFC / shop drawing review, RFIs, material and technical submittals, quantities and architectural execution details.
- Coordinated room finishes, specialist medical equipment interfaces and MEP requirements with site and third-party technical teams.

BIM Architect — GBC / Great Brand, Head Office Technical Department, Algeria | Jul 2021 – Dec 2022

- Supported coordinated hospital BIM models and drawing packages across head-office projects, including Boumerdes Hospital (240 beds) and oncology facilities.
- Reviewed Arch / Structure / MEP clashes, technical drawings and site queries, connecting model information with construction requirements.

Senior Architect — GBC / Great Brand, Algeria | Dec 2020 – Jul 2021

- Reviewed hospital technical packages, department layouts and finishes; coordinated multidisciplinary drawing discrepancies and construction-stage design clarifications.

Architect / Assistant Project Manager — GBC / Great Brand, Algeria | Jan 2019 – Dec 2020

- Site technical architecture on Chlef Anti-Cancer Centre (140 beds): construction drawings, specialist rooms, medical equipment interfaces, architectural quality checks and finishing coordination.

Lead Architect, Concept Design — Architectural Consultancy, Algeria | Dec 2013 – Dec 2018

- Developed architectural concepts, functional zoning, departmental relationships and circulation from employer-issued programs for healthcare and public-building competitions.
- Contributed to Jijel General Hospital (240 beds) and Ghardaia Hospital competition wins, progressing designs toward detailed / execution documentation; coordinated architectural production teams.

Junior Architect — Engineering Consultancies, Algeria | Sep 2010 – Dec 2013

- Prepared plans, elevations, sections and design presentation documents; progressed from drafting assistance to defined architectural design responsibilities.

SELECTED HEALTHCARE PROJECT EXPERIENCE

Jijel General Hospital (240 beds) | Ghardaia Hospital | Chlef Anti-Cancer Centre (140 beds) | Boumerdes Hospital (240 beds) | Constantine Oncology Hospital (approx. 160 beds). Experience across functional layouts, room data review, technical coordination, medical equipment interfaces, operating theatres, ICU, MRI / CT and radiation-protected spaces, with specialist requirements coordinated through relevant experts.

EDUCATION, CERTIFICATION & LANGUAGES

B.Sc. Architectural Engineering — University of Mentouri Constantine, Algeria (2009) | RICS BIM Management Certificate (ISO 19650), 2024

Arabic — Native (C2) | French — B2 | English — B2
