CERTIFICATIONS

- BIM Management Certificate — ISO 19650-aligned, RICS-accredited Online Academy, London (2024)
- In Progress 2026: AI for AEC Workflows · n8n Automation & AI Agents · Claude Code for Technical Documentation
- Planned: PMP Certification

ADDITIONAL

- Architectural & Construction Photography — project documentation from groundbreaking to handover.
- Open to: Senior Architect · Lead Architect · BIM Coordinator · BIM Manager Roles across UAE & GCC.

M. Amine Berchache

SENIOR ARCHITECT & BIM COORDINATOR · HIGH-RISE & HEALTHCARE · DM / DCD / DEWA · ISO 19650

PROFESSIONAL SUMMARY

Senior Architect & BIM Coordinator with 16+ years of international experience delivering high-rise residential, mixed-use and healthcare projects across the UAE and Algeria. Currently leading design coordination on two flagship Dubai towers — a 90-storey residential tower in Downtown Dubai and a 50+ story tower on Sheikh Zayed Road.

RICS-accredited, ISO 19650 BIM Management certified, with hands-on contractor-side site validation experience and proven fluency in DM, DCD and DEWA authority approvals. Trilingual (Arabic C2 · French B2 · English B2). Recognised for closing the gap between design intent, BIM coordination and authority compliance — delivering coordinated technical packages that build cleanly, approve faster and rework less.

KEY CAREER HIGHLIGHTS

- Leading design coordination on a combined **~130,000 m² GFA** across two Dubai flagship high-rise towers — 90-storey (Downtown Dubai) and 50+ story (Sheikh Zayed Road) — owning the full DM, DCD and DEWA submission strategy.
- Delivered DD-to-tender packages on **Kings' Square (8-tower mixed-use, Abu Dhabi)** at James Cubitt & Partners; coordinated structural, MEP, facade and BMU/cleaning systems across all 8 towers.
- Authored **ISO 19650-aligned BEP, MIDP and TIDP frameworks** at EAS Consultant, governing CDE quality, naming-convention compliance and federated model integrity.
- Designed and delivered a **240-bed regional hospital** and a **140-bed Anti-Cancer Centre** in Algeria — concept through tender documentation, full programmatic, technical and authority-compliance ownership.
- 4+ years of contractor-side site and head-office BIM experience** — RFI cycles, submittal review, BIM-based hospital design, snagging and handover — producing details that build cleanly because they have been built.

WORK HISTORY

Senior Architect

Model Engineering Consultant

Dubai, UAE

Nov 2025 — Present

- Lead architect and BIM coordinator on two flagship Dubai high-rise towers — 90-storey (Downtown) and 50+ story (Sheikh Zayed Road); combined GFA ~130,000 m².
- Drive multi-disciplinary coordination (Arch / Str / MEP / Facade) across 6–8 consultant teams; chair weekly Navisworks clash review cycles and own the resolution log.
- Own DM, DCD and DEWA authority submission strategy — translating commercial intent into compliant, first-pass technical packages.
- Maintain ISO 19650-aligned BIM workflow: BEP, MIDP/TIDP, CDE governance, model audit cycles and naming-convention enforcement.
- Reduce late-stage rework (egress, facade safety, MEP shafts) through early Arch/Str/MEP federation and design-stage clash resolution.
- Mentor junior architects on Revit standards, authority submission protocols and ISO 19650 workflows.

Revit · Navisworks · AutoCAD · BIM 360 / ACC · Bluebeam

Senior Architect

James Cubitt & Partners

Abu Dhabi, UAE · Kings' Square (8-Tower Mixed-Use)

Jul 2025 — Nov 2025

Engagement closed at completion of contracted DD package; transitioned to high-rise lead role at Model Engineering Consultant.

- Authored coordinated technical packages for facade strategy, BMU/cleaning system, green-roof + thermal insulation and landscape interface.
- Coordinated structural and MEP integration across 8 towers; led clash resolution prior to tender — approximately 1,500+ clashes resolved.
- Supported Abu Dhabi authority submission and consultant QA review cycles.
- Mentored 2 junior architects on Revit family standards and ISO 19650 workflows.

Senior Architect / BIM Coordinator

EAS Consultant

Dec 2024 — Jul 2025

Dubai, UAE

- Owned end-to-end BIM coordination for multi-disciplinary projects in compliance with ISO 19650.
- Authored and maintained BEP, MIDP and TIDP frameworks across the project lifecycle.
- Led federated model coordination and clash detection; acted as single point of contact between client and consultants.
- Ensured PIM quality, naming-convention compliance and CDE governance.

Revit · Navisworks · BIM 360 / ACC · Bluebeam

Senior Technical Architect

Dec 2023 — Dec 2024

EAS Consultant

Dubai, UAE

- Led technical design and coordination on Dubai consultancy projects with full Dubai Municipality compliance.
- Drove DD and IFC packages, developing schematic concepts into coordinated technical solutions.
- Mentored junior architects on UAE authority submission protocols (DM, DCD, DEWA).

Technical Architect

Dec 2022 — Dec 2023

Great Brand / ILK — Main Contractor

Algeria · Anti-Cancer Centre, 140-Bed Capacity

- Delivered BIM-based quantity extraction and BOQ validation for a 140-bed specialist healthcare facility.
- Managed architectural modelling and on-site coordination across structural, MEP and finishing trades.
- Supervised daily site activities to ensure schedule, quality and specification compliance.

BIM Architect — Hospital Design

Jul 2021 — Dec 2022

GB Construction — Main Contractor (Head Office, BIM Dept.)

Algeria · Hospital Facility, 240-Bed Capacity

- Based in head office BIM department; responsible for hospital design development and BIM production for the 240-bed facility.
- Produced and coordinated architectural BIM models, drawing packages and technical submissions.
- Liaised between design team and site to resolve technical queries and maintain model accuracy.
- Contributed to QA/QC review of BIM outputs; supported Arch / Str / MEP discipline coordination.

Revit · AutoCAD · Navisworks

Senior Architect

Dec 2020 — Jul 2021

GB Construction — Main Contractor

Algeria · Hospital Facility, 240-Bed Capacity

- Supported project management and BIM coordination for the 240-bed hospital construction.
- Led clash detection and technical coordination meetings between architectural, structural and MEP teams.
- Monitored site execution and finishing works for compliance with healthcare construction standards.

Architect / Assistant Project Manager

Jan 2019 — Dec 2020

Great Brand — Main Contractor

Algeria · Anti-Cancer Centre, 140-Bed Capacity

- Contributed to BIM coordination and project management on the 140-bed Anti-Cancer Centre hospital project.
- Supervised execution and ensured compliance with healthcare construction quality standards.
- Supported early-stage BIM coordination and technical documentation workflows.

Lead Architect

Dec 2013 — Dec 2018

Concept Design — Consultant

Algeria

- Led design development for hospitals, public buildings and mixed-use programs from concept through tender.
- Reviewed technical drawings produced by CAD technicians; enforced consultancy quality standards.
- Coordinated with cross-functional teams to improve structural integration and design sustainability.
- Communicated with vendors and contractors to incorporate buildability input into design packages.

Junior Architect

Sep 2010 — Dec 2013

Multiple Engineering Consultancies

Algeria

- Assisted senior architects in producing design concepts, sketches and presentation packages.
- Developed architectural drawings — plans, elevations, sections and details.
